WHY DO YOU WANT IT ?

What is Tuning and Why do You Want It ?

Tuning is an upgrade to the software in the vehicle's computer. Custom software is installed that changes many parameters that control the way the engine operates. With proper tuning, you can increase both power and fuel economy

A comprehensive tool
for high horsepower
builds.

With proper tuning
you can increase fuel
economy.

What can I Expect from Tuning ?

What can I Expect from Tuning ?

Through proper modification it is possible to greatly increase the power output of the vehicle. While at the same time improving safety and longevity of the engine, drivability, and smoothness

20 - 35 hp

roughly increase from
a stage 1 tune

35 - 50 hp

roughly increase from
a stage 2 tune
